## WORK EXPERIENCE

### FULL STACK DEVELOPER

#### TSAW Drones

09/2022 - 02/2023,

New Delhi

##### PILOT WEB POTRAL

- This was a portal exclusively for in-house drone pilots.
- Front-end was made using **ReactJs, redux, leaflet, Plotly, firebase real-time database, react-bootstrap, Axios, react-hook-form, socket.io, react-router-dom**, and so on. Some of the features of the portal are: pilots are able to see the real-time location of drones on the map, all information related to drones and flight (e.g. altitude, mode, battery, distance, etc.) is showcased and gets updated on a real-time basis, pilots can give commands (like start, RTL, toggle safety switch, pause, and land) to drones directly through the portal, pilot-owned drones, a digital B.M.S and log-flight forms, flight manual, change password and forget password feature and so on.
- The backend was based on **MySQL, Sequelize, nodeJs, express**, and so on.
- **CLIENT WEB PORTAL**
- This portal was built for company clients.
- Front-end was made using **ReactJs, redux, react-bootstrap, Axios, react-hook-form, react-router-dom, react-toastify**, and so on. The backend was based on **MySQL, sequelize, nodeJs, express**, and so on.
- Some of the features of the portal are: client can place an order using a digital form, clients can also see all of their previous orders, forget password, change password, and so on.
